Dec. 13, 1977; Leitchville, Victoria, Australia

11:00 PM. An orange-red, disc-shaped object descended over a paddock. It then emitted three smaller objects that operated independently. One of these zigzagged, abruptly shot up to higher elevation, then descended again. The UFOs appeared to signal back and forth. Soil and grass samples collected from a circle of burnt grass found on the ground reveal the burn marks were caused by an electrical discharge. No electrical power lines are located near the paddock where the ground traces were discovered. The sighting lasted 30 minutes.
