Sighting Report

Occurred : 7/1/1983 01:30 (Entered as : 07/01/83 1:30)

Reported: 1/6/2007 8:00:38 AM 08:00

Posted: 2/1/2007

Location: Swayzee, IN

Shape: Unknown

Duration:30 minutes

Hovering green, blue, and yellow lights over a wooded area, landing, then taking off into the night sky.

I observed lights hovering over a wooded area about 1/2 mile away. I was in an upstairs bedroom and had full view. The lights which were green, blue and yellow, were then diminished but still could be seen. I believe that whatever had been hovering over the wooded area landed. I notified my stepfather and told him to look. He did, but thought that it was a wrecker recovering a vehicle. He later went back downstairs and I continued to watch the lights flashing. Later I observed these lights hover again over this wooded area for about 10 seconds. I then saw it shoot up into the sky faster than anything I had ever seen. I was 13 at the time and I do still believe I saw something unidentified and can not be explained. I never investigated the area where a "Possible Landing" occurred, but I've always wondered what it was or what it was looking for.
