Incident #93 -- Hartford, Connecticut -- 11 January 1943

Despite the absence of a trail and of sound, identification of this object as a fireball at the very end of its trajectory seems possible. It is described as "shootin' toward earth at 45°," as resembling a "shootin' star," and as having a very high velocity.

Object appeared to be a disc which had a bluish center and red on its edges and was traveling at a very high velocity. It had no tail nor did it leave any sort of a trail in the air. Because of its high velocity and the short space of time that it was sighted neither observer could be certain of the size but in general, report it resembled a shooting star. It dropped out of sight on the north side of Mt. Tom which is near Holyoke, Mass.

Extract from Weekly Intelligence Summary, ATO, 23 Jan 48

UNIDENTIFIED AIR OBJECT: The A-2, Atlantic Division, Air Transport Command reports that while flying over Hartford, Connecticut at approximately 1630 hours, 11 January 1948, Captain Kenneth M. Helton, AO-660566 and Captain James J. Fargoe, AO-543982 of Squadron "D", Air Evacuation, sighted an unidentified object shooting toward the earth at an angle of 45°. The object appeared to be a disc, had a bluish center, was red on its edges and was traveling at very high velocity. It had no tail, nor did it leave any sort of trail in the air. Because of its high velocity and the short space of time that it was sighted, neither observer could be certain of its size but in general, report that it resembled a shooting star. It dropped out of sight on the north side of Mt. Tom, which is near Holyoke, Massachusetts.

HEADQUARTERS, AIR WEATHER SERVICE Andrews Air Force Base, Wash-
ington 25, D. C.

TO: Commanding General, Air Materiel Command, Wright-Patterson
Air Force Base, Dayton, Ohio
ATTN: MCIA XO

Investigations by this headquarters reveal that a synoptic
weather balloon could have been at the location where sightings
were reported in the following incidents. In compiling this
list consideration was given to the wind direction and speed at
the surface and aloft at the scheduled time of balloon release, and
the location of the nearest weather station making balloon obser-
vations.
