Re San Antonio letter to the Director dated January 31, 1949, which outlined discussion had at recent weekly Intelligence Conferences of G-2, ONI, OSI and FBI in the Fourth Army Area concerning "Unidentified Aircraft" or "Unidentified Aerial Phenomena" otherwise known as "flying discs", "Flying saucers" and "balls of fire". It is repeated that this matter is considered secret by Intelligence Officers of both the Army and the Air Force.

G-2, 4th Army, has now advised that the above matter is now termed "Unconventional Aircraft" and investigations concerning such matters have been given the name "Project Grudge".

G-2, 4th Army, advised on February 16, 1949, a conference was held at Los Alamos, New Mexico, to consider the so-called "Green fire ball phenomena" which began about December 5, 1948. It was brought out this question has been classified "secret" and that investigation is now the primary responsibility of the U.S. Air Force, Air Materiel Command, T-2.

Dr. LINCOLN LA PAZ of the University of New Mexico, discussed one sighting which he himself had made which was termed the "Starvation peak incident" and described the following characteristics which indicated that the phenomenon could not be classified as a normal meteorite fall.

1. There was an initial bright light (no period of intensity increase) and constant intensity during the duration of the phenomenon.
2. Yellow green color about 5200 Angstroms.
3. Essentially horizontal path.
4. Trajectory traversed at constant angular velocity.
5. Duration about two seconds.
6. No accompanying noise.

DIRECTOR, FBI

March 22, 1949

It was brought out that since December 5, 1948 there have been more than ten incidents analagous to the "green fireball" above described and some twenty others with minor deviations from the above. It is also pointed out that the only sitings which had occurred seemed to have been confined to the Los Alamos, Las Vegas, and West Texas triangle.

G-2 also advised that as of November 1, 1948, information had been received from higher Military authorities that the Air Force had advised that such sitings occur periodically and that another period of sitings was then imminent. Further, on February 14, 1949, higher Military authorities advised that it was believed that ultimately it would be found that the phenomena in question have a natural explanation.

It is further noted that about 7:30 p.m., March 6, 1949, what was at first thought to be a flare was seen approximately one-half mile north of Killeen Base in the area of the Vital Installation at Camp Hood, Texas, and a second flare was noticed at 1:45 a.m., March 7, 1949, approximately three miles from Killeen Base. It has since been concluded that the flares seen near Killeen are probably similar to the phenomena previously noted in the Los Alamos, Sandia Base Area although these are the first sitings of such phenomena near Camp Hood.

There appears to be reason to believe that the above-mentioned phenomena may be connected with secret experiments being conducted by some U.S. Government Agency as it is believed that the United States is farther advanced in guided missile development than any foreign power.

Although the primary responsibility for investigating such matters is now with the U.S. A.F. Air Materiel Command, G-2, 4th Army is still interested in being advised of any further sitings of such phenomena which might be observed.
