Cuswell, Main

Saucer shaped gray colored object approximately the size of a dime was visually observed from an F-94 a/c at 1000 EST traveling at an indicated air speed of 325 MPH at 23,000'. Position of a/c at the time of sighting was 46 Deg 30 min N, 67 Deg 23 min W. Object was observed at a 12 o'clock position at an estimated 10,000' above a/c. An attempt was made to intercept object but due to shortage on fuel the interception was discontinued.

ATIC Comments:

Balloon possibility checked and object's course did not coincide with winds aloft. No known a/c in the area.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112--Part II.)			
<p>The information contained in the inclosures was reported by T&amp;X in accordance with AFM 201-5, Dated 29 April 1952. The object was also sighted by at least two fighter aircraft from other squadrons. The conversation among the pilots and R O's was heard by A/IC Ferdinand who was on duty at the ADEC. Not knowing which of the pilots and R O's were talking the conversations went as follows:</p> <p>Pilot said, "Do you see that thing above us?" Answer, "No" Reply, "It sticks out like a sore thumb."</p> <p>Then someone said, "If I were going to catch it I would drop the wing tanks first."</p> <p>Another said that he would never admit what he saw.</p> <p>The T&amp;X sent earlier by this organization reported that the ADEC was not painting the B-29 which was orbiting in the area. This portion of the T&amp;X was in error, as a subsequent report from ADEC revealed that both the B-29 and our F-94B were being painted, and, further, that there were no "Unknowns" being painted in the area.</p>

Statement Of F-94B Radar Observer

On the morning of 29 Jan 52 I was flying as radar observer in the rear seat of an F-94B. After a few interceptions on another F-94B I turned the jet off for the remainder of the mission. This was because of generator difficulties.

We then flew down to the Millinocket, Me area to try to intercept a B-29, "Nicholson Able-6". She circled Millinocket for a while and then headed toward Houlton, Me but never spotted the B-29 which was supposedly flying over Houlton at approximately 1000 KFT on a magnetic heading of 070 degrees. When over the St. John River the pilot spotted an object straight ahead of us. I finally saw the object after he had pointed it out repeatedly. We turned right so as to displace object to the left. We then resumed our 070 degree heading and chased the object for several minutes at a speed of .8 Mach at 23,000 feet (approx 470 K TAS). We did not close on the object and soon broke off because of low fuel supply.

The object was grey and in shape was thin and oval. It was at a small angle (5 degrees at most) above us. It stayed stationary in the sky during the chase. It was well-defined and dull-colored, that is, it was not shiny or luminous. There was no visible means of propulsion nor was there any exhaust smoke or contrails. The object appeared unbroken in outline and there were no portholes or windows visible.

After we had landed and studied the problem I decided we had been about 40 miles NE of the St. John River when we broke off. After comparison with a dime held at arms length I believe the object was about 1/2 to 3/4 the size of a dime.

We landed about 10 or 15 minutes after breaking-off.

Statement of F-94B Pilot

On 29 Jan 53 I was flying as pilot in a F-94B aircraft on a routine training flight. After making a few intercepts on another F-94, the GOI station vectored us to the Millinocket area to intercept B-29 Nicholson Able-6. We stayed in the Millinocket area for approximately fifteen (15) minutes with no contact with the B-29.

Deciding that the B-29 had passed Millinocket I took up a heading of 070° magnetic, this course took us directly over Houlton. Just after passing Houlton and approximately over the St John river I spotted an oval and thin shaped object about 10° above and approximately on the same course as my own (070° magnetic). After repeatedly pointing out the object to the Radar Observer, he finally spotted it too.

The object was a dark gray color with a very definite, and clearly defined shape. It did not shine, or give off lights, nor was there any visible exhaust or contrail.

We were at an altitude of 23000 feet and chased the object at .8 MACH. This chase was continued for approximately 8 minutes with no visible change in the range of the object. According to the maps and dead reckoning, we had chased the object forty (40) miles northeast of the St John River. At this time we broke off and returned to base to land.

## U. S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U. S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

29      JAN      53  
Day      Month      Year

2. Time of day:

09      55  
Hour      Minutes

(Circle One):  A.M. or P.M.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object?  
(Circle One):

- a. Inside a building  
 b. In a car  
 c. Outdoors  
 d. In an airplane  
 e. At sea

 e. Flying over a city?  
 f. Flying over open country?  
 g. Other \_\_\_\_\_

27. What were you doing at the time you saw the object, and how did you happen to notice it?

Flying to home because of object in straight flight towards it.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- a. North  
 b. Northeast  
 c. East  
 d. Southeast  
 e. South  
 f. Southwest  
 g. West  
 h. Northwest

28.2 How fast were you moving? 325 Kts. I.A.S. miles-per-hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes  No

29. What direction were you looking when you first saw the object? (Circle One)

- a. North  
 b. Northeast  
 c. East  
 d. Southeast  
 e. South  
 f. Southwest  
 g. West  
 h. Northwest

30. What direction were you looking when you last saw the object? (Circle One)

- a. North  
 b. Northeast  
 c. East  
 d. Southeast  
 e. South  
 f. Southwest  
 g. West  
 h. Northwest

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 070 degrees.  
 b. From horizon 10° degrees.

31.2 When it disappeared:

- a. From true North 070 degrees.  
 b. From horizon 10° degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the *same* curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle One)

- a. No wind
- b. Slight breeze
- c. Strong wind
