<b>10. BRIEF SUMMARY OF SIGHTING</b> Ball of fire appeared on the side of the road. Stood there for about 5 mins. Observers got out of car for better view. Became frightened and returned to car. Ball followed them back. Car wouldn't start. Ball came within 5-6 ft of car then moved off in another direction. Ball of fire estimated to be 2½ ft in diameter. Bouncing motion. Seemed to "flow" away.			<b>11. COMMENTS</b> Description of ball lightning sighting.

They held hands and he told me that they were so scared that he almost went through the car window.

They described the ball of fire as being about  $2\frac{1}{2}$  feet in diameter.

They describe the ball as bouncing when it came towards them and when it left it seen to fly or flow away.

I am interested in as much information about objects similar to this description.

Would you please forward as much information as possible to the above address

Thank you  
Sincerely Yours
