SUMMARY: (Enter concise summary of report. Give significance in first one sentence paragraph. See instructions for left margin. Brief text desired on AF Form 112-Part II.)		
<p>Report of unidentified light, thought to be a Celestial Phenomenon or strange flying object, as seen by Capt. J.E. Spurgin, Capt. B.N. Stephan and Mrs. B.N. Stephan on about 2210, 20 May 1952.</p> <p>Comments of Reporting Officer:</p> <ol style="list-style-type: none"> 1. The two officers who are the source for this report were observing the stars in conjunction with their sextant practice at the home of Capt. Stephan. Mrs. Stephan was also present. Sighting was made and faithfully corroborated by all three witnesses. 2. Capt. J.E. Spurgin is a rated pilot, 10 years commissioned time with approximately 1400 hours flying time. 3. Capt. B.N. Stephan is a rated pilot, 4 years commissioned time with approximately 2000 hours flying time. 4. Both of these officers are now in the Single Observer School at Ellington, TX and are at present engaged in Celestial Navigation studies. 5. Mrs. B.N. Stephan was not personally interviewed. 6. In summary it is this officer's opinion that these officers with their long background experience in the field of aviation made a competent observation. What it was would be a matter of conjecture. <p style="text-align: right;">John D. Clark!</p> <p>JOHN D. CLARK Captain, USAF Actg Intelligence Officer</p>

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	of	PAGES
Intelligence, 3605th Nav Trg Wg, Ellington AFM, Houston, Texas	IK-1-52	1	1	1

Statement of facts received from interrogation of Capt. J.E. Spurgin, A0664270, and Capt. R.W. Stephan, A0827068. Both men are assigned to the 3609th Nav. Trng. Sq. (Mil) Ellington AFM, Houston, Texas, and are at present pursuing a course in Celestial navigation in the Single Observer School Program.

On the evening of the 20th of May, 1952, the two officers accompanied by Mrs. B.M. Stephan, wife of one of the officers, were standing on the lawn in front of the home of Capt. R.W. Stephan at 7416 Stanwick Drive, Houston, Texas. They had just completed sextant practice and were engaged in searching the skies to locate some additional star constellations. They were facing North when at 2210 they all observed a very bright orange white light moving toward them through the skies from about 45°. They observed this light for about ninety seconds during which time it progressed to a point just south of their position and turned gradually moving away from them on a course of approximately 300 degrees. The shape of this sighting is unknown. No exhaust or trail was seen. There was no sound heard. Maneuvers were in the form of erratic movements from side to side in a general straight course to the point of turn. Sighting continued above horizon until due to distance it was no longer visible. The observation was from the surface and was visual. Speed very fast but unable to estimate accurately as size of object and altitude of object unknown. The skies were clear with wind at surface light, approximately 10 knots per hour. The surface air was warm, between 70° and 75°. There was no known meteorological activity to account for sighting. There is no physical evidence such as photographs to work up sighting. There was no interception action taken.
