COUNTRY UNITED STATES	REPORT NO. IR-1-52	(LEAVE BLANK)
AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT Unidentified Flying Objects (FLYOBPT)		
AREA REPORTED ON Albuquerque, New Mexico	FROM (Agency) Hq 4901st Support Wing (Atomic)	
DATE OF REPORT 9 June 1952	Kirtland Air Force Base, New Mexico	
PREPARED BY (USAF) Major Roy L. Huddleston, USAF	DATE OF OBSERVATION 28 May 1952	CLASSIFICATION C-3
REFERENCES (Cite title, number, date, author, etc., as applicable)	SOURCE Martin Rosero, 719 No. Arnold Don Atteberry, 6720 Cochita Rd	
SUMMARY: (Brief concise summary of report. Give significance in final one-sentence paragraph. List inclusions at lower left. Begin text of report on AF Form 112-Part II.)		
<p>Three unidentified flying objects were sighted over Northeast Albuquerque by two city fire department employees at three different intervals during a day of clear skies except for a few scattered cumulus clouds over the mountainous area north and east of the city.</p> <p>The first object was sighted at 1345 MST approaching from the northeast toward the observers at a high altitude and an extremely high speed. It had a circular shape, a shining silver color, no visible source of propulsion, and no sound could be heard. The object approached to a point estimated at four miles from the observers and then rose in a sharp clockwise circle. Sight was lost because of the higher altitude attained.</p> <p>Two similar objects approached at a lower altitude (estimated at 15,000ft.) from above the mountains northeast of the observers at 1400 MST. They moved in a straight line and appeared to move faster than the first object. Both seemed to be of the same design as the first object, but had an orange or light brown color. The objects turned abruptly when they reached a point approximately on a forty (40) degree angle to the observers and turned to a northwest course. The objects seemed to be thirty (30) to forty (40) feet in diameter at this point, which was the closest approach of an object at any time. The two objects flew in close formation toward the northwest until sight was lost.</p> <p>A third sighting was made of an object flying high over the mountains northeast of the city at 1440 MST. It had the same characteristics as the first object spotted at 1345 MST. The object was flying among scattered cumulus clouds high over the mountains in a curving course from northeast to southeast. Sight was lost due to the high altitude gained by the object.</p> <p>The above mentioned objects were unfamiliar to the observers and seemed to have no characteristics similar to aircraft seen by them in this vicinity.</p>
