

Leon Faber Sees a "Flying Saucer" While Enroute to Michigan

Leon Faber gave Sandwich a lot of publicity last week when the news became known that he had seen a "flying saucer." The Chicago papers and other papers carried the story.

Mr. Faber was flying to Lansing, Michigan, on Thursday, when he saw the mysterious object, which he said was bright and shining, moving east. He was flying over the Gary-Michigan City area at the time.

He was flying at 6000 feet and the object was about 10,000 feet away and looked about as large as a basketball. It was on its flat side and just disappeared suddenly. It didn't get any smaller and suddenly it disappeared. Mr. Faber said it was the most stunning and amazing thing that ever happened to him.

Word of the mysterious object was relayed to the news service in Chicago by a "ham" operator who was communicating with Mr. Faber when the flying object disappeared so it was a surprise to Mr. Faber to have reporters asking for him when he arrived in Lansing.
