

<a href="#">Go Back</a>	<b>Report # 876</b>
<b>03-08-1957</b>	
At Baudette, the sighting had been made on the ground by a pilot with 2,000 flying hours. The object he saw was circular, from fifteen to eighteen feet in diameter. Moving upwind, its odd glow shone on the snow-covered ground. It was so low that it seemed to suck the loose snow up under it as it passed.
