

It's A Bird, It's A Plane, It's Shaped Like

A HOTDOG

"I saw something I never want to see again," 15 year old Greg Hughes screamed to his brother, Jackie, recently at their farm at Fairview.

Greg first saw "something" around 5:15 a.m. October 10 as he was driving the cows back to the barn for milking.

"I rode my horse into the woods and saw an orange object about eight to ten feet above the ground. First, I thought it was a airplane. It came toward me and got brighter and larger, and made noises like sirens

wailing.

"It was shaped like a hotdog and about eight feet long," Hughes said.

"My horse nayed and the cows bawled. I ran one-third of a mile back to the barn to tell my brother what I saw. When I turned around at the barn, I couldn't see the object any where," he said.

According to Jackie Hughes, there were no burn marks on the ground where the apparent UFO (unidentified flying object) hovered.

"The cows were so spooked that they nearly beat the horse and me back to the barn.

"It's kind of funny, but the cows come home on their own now," Greg said.
