[REDACTED]

SUBJECT: Recapitulation of Facts Concerning Unidentified Objects Sighted  
in the Great Falls, Montana Area on 29 July 1952

1. Tuesday, 29 July 1952, at approximately 1540 hours MST four (4) unidentified objects were sighted over Great Falls AFB. Objects resembled flat discs, reflecting sun's rays. Position due south from Great Falls AFB (Incl. 1). One (1) object was stationary and three (3) were seen circling around it. They were seen for three (3) to four (4) minutes, then the stationary object flew southeast. The other three (3) due west and disappeared. No sound was emitted or exhaust was observed. Speed of the objects was estimated at over one thousand (1000) miles per hour. Altitude was not determined due to fact that the size of a C-54 aircraft, objects were estimated to be above 30,000 feet. All objects were visual from the ground. They were seen by an estimated fifty persons including officers, airmen and civilians (statements attached as Incl. 2). Objects were also seen by a resident of the city of Great Falls, Montana (statement attached as Incl. 2).

2. First notification of flying objects was heard from the Seattle, Washington area (presumably McChord AFB) over the Plan 62 Voice Circuit of the Transport Control Center, this Base. The transmission was cut off suddenly, immediately after the statement regarding "flying saucers" was made. This transmission was heard by a number of individuals. One individual, S/Sgt [REDACTED], 1701st Traffic Squadron, this Base, sighted objects immediately after this Plan 62 transmission and called GAA Tower, Gore Field, Great Falls, Montana. Who in turn notified a local newspaper, the Great Falls Tribune. A reporter from the Great Falls Tribune contacted S/Sgt [REDACTED], who inadvertently gave the reporter information regarding unidentified flying objects and Plan 62 transmission from the Seattle, Washington area, upon which the release in the Great Falls Tribune was based. At approximately 2200 hours MST S/Sgt [REDACTED] received a call from an individual who identified himself as [REDACTED] Officer, McChord AFB, who denied any transmission or reception of any statement regarding "flying saucers". S/Sgt [REDACTED] was in error on releasing this story, in that he had not received or had he contacted the Base Commander, Base Information Officer or Base Intelligence Officer.

3. At 1200 hours MST Thursday, 31 July 1952, the local radio station [REDACTED] broadcast an interview with a Mr. [REDACTED], resident of Great Falls, Montana. He claims to have seen and took pictures of unidentified flying objects and that he had turned the undeveloped film over to the Air Force. He contacted the manager of the radio station WJON, who informed us that [REDACTED] had turned the undeveloped film over to the Commanding Officer [REDACTED]

1 - Recapitulation of Facts  
(with inclosures)

GEORGE S. GEANETOS  
Lt Colonel USAF  
Wing Intelligence Officer

STATEMENT OF WITNESS

Major [REDACTED] Great Falls, Mont.

I, [REDACTED], on the 29 July was returning with my family from a fishing trip in Idaho, we had not heard a radio or read a newspaper in the days we had been gone. About eight (8) miles south of Ennis, Montana, traveling from West Yellowstone to Ennis between 1400 and 1500 hours MST I noticed a dark colored object hovering over the mountains to the right of the highway. I slowed down and stopped the car, and as I did so the object formed a white cloud around itself. The distance was, as I would estimate it three or four miles in a direct line and the clouds were about one thousand feet above the summit of the mountain. Shortly after that three smaller disc like objects came bursting out of the clouds from different angles traveling at an estimated two hundred miles per hour. Each of these objects made an arc in different directions and at the peak of the arc accelerated at a terrific speed and departed to a central point behind the clouds and disappeared. There was a trail of very hazy film of dark colored smoke. I had an eight-power binocular when I was watching this.

I stopped two other cars, one from Arkansas and one from Ohio. The man in the car from Ohio had a pair of 50-power binoculars. We all, and I think there was about a dozen of us, watched with the naked eye and binoculars. Shortly after the three objects left the cloud five objects appeared on the right side of the cloud in a V formation traveling slowly and then each of these in succession formed a small cloud around themselves. They changed formation from the V to single file and entered the big cloud one behind the other.

During this time I took colored moving pictures with an 8mm Bell and Howell camera and still pictures, black and white, with a Kodak Retina camera. We watched this phenomenon for atleast thirty minutes and the whole time while we were watching them no other clouds formed in the sky in our range of vision. Upon the advise of a civilian friend Elias, undeveloped, were turned over to Major [REDACTED] of the 29th Air Division, at Great Falls Air Force Base, Montana.

Along about the end of the thirty minutes on a mountain to the left of the highway and some six miles estimated from us another cloud suddenly appeared and the same phenomenon took place with objects leaving and returning.

I wish to add that I am a Major in the Army Corps of [REDACTED] and Had a "C" Clearance 1946 to 1948 while stationed with Z Division, Sandia Base, Albuquerque, New Mexico.

(Signed) [REDACTED]

Major J. M. Penny, USAF

Major

Great Falls, Montana

Should be read in conjunction with observations from Great Falls AFB on 29 July 1952 as reported in IR, this Hq., dated 4 August 1952, numbered IR-473-52.

Submitted in accordance with AF LTR No. 200-5, dated 20 April, 1952, Sub: Unidentified Flying Objects Reporting.

Between the hours of 1400 and 1500 MST, 29 July 1952, from four (4) to nine (9) unidentified flying objects were reported observed visually with naked eye and high-powered binoculars from surface position approximately  $111^{\circ}$ ,  $40'$  W -  $45^{\circ}$ ,  $15'$  N, some 8 miles south of Ennis, Montana (\*) by a Major, USAF [redacted], and other unidentified persons.

When first observed there was one indefinitely shaped object, non-transparent, dark color hovering about 1000-ft above a mountain some 3 to 4 miles distant from observer. This object then appeared to hide itself in a self-emitted white cloud. Shortly after three (3) smaller disc-like objects burst out of the cloud from different angles traveling at estimate 200 MPH, each making an arc in different directions; at peaks of arcs they accelerated to terrific speed and returned to central point behind cloud. After the three smaller objects burst from the cloud to form the arcs, five other objects approached from the right in a V formation traveling slowly; then each of these in succession formed small clouds around themselves and changed from the V to single file and entered the big cloud; (Attached is diagram of these maneuvers). Some 30 minutes later another cloud suddenly appeared over a mountain some six miles from observer and same phenomenon took place.

(\*) For exact location see World Aeronautical Chart, Incl. #1 to FLYORPT observations from Great Falls AFB on 29 July 1952 as reported in IR by Int. Off., CNTID, MATS on 4 August 1952.

Time of observations: 30 minutes. Weather conditions: Not reported.

Observer took 8mm motion pictures (Bell & Howell camera) with colored film, and still shots with Kodak Retina in black-and-white. Films turned over to Major [redacted], Air Division Defense, Great Falls AFB, who dispatched films to WADF, Hamilton AFB, Calif. Later WADF advised to ship films immediately to ATIC.

2. Statement of Observer

JOSEPH M. PENNY  
Major, USAF  
Chief, Intelligence Division

**Subject: Recapitulation of Facts Concerning Unidentified Objects  
Sighted in the Great Falls, Montana Area on 29 July 1952**

of the 29th Air Division Defense, attached this station. Mr. [REDACTED] was thereupon contacted and he stated that between 1400 and 1500 hours MST, 29 July 1952, he sighted unidentified flying objects about eight (8) miles south of Erwis, Montana, 115 miles south of Great Falls, Montana. Mr. [REDACTED] took still and moving pictures of the objects in both color and black and white film. On the advice of a civilian friend he called the Commanding Officer of the 29th Air Division, who dispatched the Intelligence Officer, 29th Air Division, Major [REDACTED], to contact Mr. [REDACTED] thereupon Mr. [REDACTED] turned the undeveloped film over to Major [REDACTED] who dispatched the film to Headquarters WADF, Hamilton AFB, California. Colonel Paul Greiner, Commanding Officer 29th Air Division and Major McCarthy, Intelligence Officer, 29th Air Division, were informed that in accordance with AF Letter 200-5 the Air Technical Intelligence Center, Wright-Patterson AFB, Ohio, should have been notified immediately for shipping instructions and that this headquarters should have been notified of the action taking place. Colonel Greiner stated that he had telephoned Headquarters WADF requesting that they contact ATIC for shipping instructions and that all matters of this nature would be coordinated with the 1701st Air Transport Wing Intelligence Officer in the future. Mr. [REDACTED] was contacted by this Headquarters and he gave a statement and drawing (Incl. 3 & 4) and he further stated that he would appreciate having his film back when the Air Force is through with it.

4. At the time of the sighting aircraft flying in the local area consisted of two (2) C-47, eight (8) C-54 and one (1) B-25.

5. Weather at the time of the sighting was clear with visibility of sixty-five (65) miles and surface winds were calm. (Incl. 5)

6. The Intelligence Officer of the 29th Air Division Defense, attached this station, was contacted and he stated that the unidentified flying objects were not picked up on any 29th Air Defense radar screens. The Commander of the 1906-5, AACS Squadron Detachment, was contacted and he stated that no sightings of these objects were made with the CCA radar scope.

7. Additional information regarding unidentified flying objects was uncovered during this investigation, a sighting on 5 November 1950. At 0600 hours MST on 5 November 1950, Mr. and Mrs. [REDACTED] Great Falls, Montana, were traveling east on highway No. 87 between Great Falls and Raynesford, Montana. At this time they observed an object moving east to west which passed by the front of their automobile. This object was disc like with a strong white light in front and emitting blue-white sparks to the rear (drawing attached). Mrs. [REDACTED] states that the object seemed to be about the size and shape of an automobile tire looking broadside and spinning through the air. The complete front side consisted wholly of this strong white light. The body, which appeared to be spinning, was judged to be approximately eight (8) inches thick. The blue-white sparks were emitted for approximately

**Subject: Recapitulation of Facts Concerning Unidentified Objects  
Sighted in the Great Falls, Montana Area on 29 July 1952**

thirty-six (36) inches behind the object. Mrs. [redacted] states that she was within one hundred feet of the object as it passed by and that there were no sound connected with it, although she cannot be sure in that as she was riding in a closed automobile. (Drawing as suggested by Mrs. [redacted] is attached as Incl. 6).
