☐ Insufficient Data for Evaluation
☒ Unknown

10. BRIEF SUMMARY OF CIRCUMSTANCES
Orange object shaped like an air blimp moved slowly across highway at low speed. Observers stopped automobile, saw object hover, tilt at a 45° angle, and rise. When object passed in front of the moon, it seemed to blend with the color of the moon. Object disappeared at a tremendous speed. Source's car had passed under object, and the car radio had "cut out" while the object was overhead. Source estimated altitude to be 500'.

11. COMMENTS
1. A very puzzling report.
2. Asking ONR and AF about possible high altitude balloons.

7November 1952

SUBJECT: Report of Unidentified Object

TO: Commanding General
Fourteenth Air Force
Robins Air Force Base, Georgia

Attn: Chief, Intelligence Section

1. Attached is written report in the handwriting of 1st. Lt. James E. Allen who is assigned to this Squadron.

2. Lt. Allen desired this incident reported to the Air Force for whatever value it may have, but does not want the story given to the newspapers for fear that he may be the object of the ridicule he has heretofore bestowed upon others relating similar occurances.

CHARLES E. SMITH, JR.
Lt. Col., USAFR
Commanding

24247

On the evening of October 31 at 7:40 PM while traveling North on highway #85 toward Atlanta some 4 miles from Fayetteville a strange object was seen flying overhead.

This strange object appeared to be flying at treetop level as I approached it. It was of orange color and very similar to an air blimp. I was traveling at a speed of 60-70 miles per hour as I approached this object. It was coming directly over the road some 200 yards ahead so I immediately thought of falling aircraft and tried to stop before traveling beneath it. However, I went under the object which was moving very slowly across the road. As I passed under, the radio in the car was silenced as if traveling over a bridge or under-pass. There was no static - just silenced until object was passed.

As I quickly got out of the car, the object seemed directly overhead

On the evening of October 31 at 7:40 PM while traveling ~~north~~ on highway #85 toward Atlanta some 4 miles from Fayetteville a strange object was seen flying overhead.

This strange object appeared to be flying at ~~the~~ tree top level as I approached ~~the~~ it. It was of orange color and very similar to an air blimp. I was traveling at a speed of 60-70 miles per hour as I approached this object. It was coming directly over the road some 200 yards ahead so I immediately thought of falling aircraft and tried to stop before traveling beneath it. However, I went under the object which was moving very slowly across the ~~front~~ road. As I passed under, the radio in the car was silenced ~~by~~ as if traveling over a bridge or under-pass. There was no static - just silenced until object was passed.

As I quickly got out of the car, the object seemed directly overhead at an estimated 500 feet. The length was estimated 4 times the height and width. (80' x 20' x 20'). A clear bottom view, side view, and ~~aside~~ view was seen. After

lingering for about 20 seconds overhead the nose seemed to point in a 45° climb steadily increasing in speed and angle of climb until it disappeared slightly to the left of the moon and in an easterly direction. The speed was tremendous and completely disappeared in approximately 40 seconds.

There were no sparks nor was there any sound. The night was very clear and stars and moon very bright. There were no light beams visible and I looked all around.

This object was very dull orange near the center line and was brighter near the outer border edges.

As the object passed between the view of moon, and my location, on the upward climb, the color seemed to blend in with that of the moon, but was still visible.

James E. Allen

Unidentified flying object was visually observed at a low altitude in the vicinity of Atlanta, Ga., at 00402, 1 Nov 52. Request you advise us of any possible Air Force upper air research balloons which could have been in the area at time of sighting. We have already questioned Office of Naval Research at University of Minnesota regarding this.

In reply cite Project Blue Book.
