I first observed the object approximately 2300C when I was on my way to work in the Control Tower. I observed personnel in the tower watching the sky and looked up and spotted the object. The speed was in no way excessive and I can recall only one blinking amber light on the under side of the object. It appeared in the shape of a very large aircraft and what attracted my attention was that there was no engine noise what so ever for what I thought was an aircraft and later learned was reported to be an unidentified object. I observed the object for about 45 seconds when it was hidden from my view by buildings. I also observed the light from the object as it circled a civil field Northeast of Carswell either 2 or 3 times and then disappeared east-bound. This was observed from the Control Tower.
