3820

From: Commanding Officer, Utility Squadron EIGHT
To: Commander Caribbean Sea Frontier

1. In accordance with enclosure one of OPNAV Instruction 3820.9 the following is submitted:

1. Description of the object:

a. Delta.
b. About size of operational fighter (F4).
c. Dark (black or gray).
d. One.
e. DNA
f. Delta shape, one heat source, trail visable.
g. No contrail, light source emitting from tail of delta shape during periods of acceleration.
h. None.
i. Very high speed.

2. Description of course of object:

a. Report of high speed target in area by tracking ship, USS GYATT.
b. About 45° on starboard side 3 o'clock position.
c. About 15°, 9 o'clock position.
d. Flew over head, very high altitude at very high speed turned to north about 276° of turn and passed by in about 16° dive on parallel course about 9 miles away, circled to right around observer and joined up at about 8 or 9 miles in 9 o'clock position, speed .84 at 30,000 feet heading 145° magnetic.
e. Upon execution of a rapid descent target failed to follow down to lower altitude, last position 6 o'clock, 4 miles.
f. About 21 minutes off and on.

3. Manner of observation:

a. Visual (airborne)
b. None.
c. DF-8F, 144456, 30,000 feet, 145° magnetic, .84, Utility Squadron EIGHT, Navy 1506, Fleet Post Office, New York, N.Y.

4. Time and date of sighting: 200112Z November

a. 200112Z November 1964.
b. Night.

5. Locations of observer: Middle of Puerto Rico, Lat. 18° 10' N Long. 66° 12' W.

6. Identifying information of all observers:

a. None.
b. Kyle H. WOODBURY, LCDR, USN, pilot, Executive Officer of Utility Squadron EIGHT.

7. Weather and winds aloft conditions at time and place of sightings:

a. Clear, vis. more than 15 miles, low scattered cumulus at 2-5 thousand feet.
b. NA
c. None.
d. More than 15 miles.
e. Less than 2 tenths.
f. None

8. Any other unusual activity or condition, meterological, astronomical, or otherwise, which might account for the sighting. None.

9. Interception or identification action taken (such action may be taken whenever feasible, complying with existing air defense directives:

Attempted to turn 90° to port to close target at 9 o'clock position. (Unsuccessful) Target accelerated out of sight in wide starboard turn climbing thru 50,000 feet at about 18°-20° angle of climb in excess of MACH 1.

10. Location of any air traffic in the area at time of sighting. None.

11. Position title and comments of the preparing officer, including his preliminary annalysis of the possible cause of the sighting:

Executive Officer, Utility Squadron EIGHT. There is no reasonable explanation of this target. Its speed, acceleration, ceiling and ability to de-cellerate exceed any aircraft I have ever seen or heard of. The ship conducting the exercise, the USS GYATT held track and has supporting data on this contact and first warned me of its presence and kept me advised of its re-appearance. Communications were very poor (UHF at 230 miles). I would evaluate target as aircraft, very high performance, maneuvered as an aircraft and performed no unusual maneuvers except, extreme acceleration and de-celleration at will, plus a very steep climb angle in excess of 50,000 feet at high speed. No lights on board except what looked like after burner light (single source) during acceleration.

VF12/VU3/10:com
3820

12. Existance of physical evidence, such as materials and photographs. USS GYATT indicated radar scope pictures were taken.

DETAILED EVENTS OF THE EVENING OF 19 NOVEMBER 1964

On the evening of 19 November 1964 while conducting project operations on board the USS GYATT in Latitude 20° 41.5 North 68° 34' West, the following sequence of events were noted by crew members of the USS GYATT (DD 712) and Norfolk Test and Evaluation Detachment personnel.

The radar used was the SPS-49 Radar, operating in the 850 - 942 mc range, manufactured by the Raytheon Co., Wayland, Massachusetts. The type video shown is Moving Target Resolver (MTR). The pictures were taken with the Universal Shipboard Radarscope Recorder, manufactured by the Heavy Military Electronics Department, General Electric Co., Syracuse, New York. The range of the video shown is 225 miles from GYATT with the range rings about forty-five miles apart.

The Naval aircraft involved was "SALT SPRAY 26", an F-8C aircraft of Utility Squadron EIGHT, based at Roosevelt Roads, Puerto Rico. This aircraft was flying at an altitude of thirty thousand feet from the commencement of the scheduled exercise at 2020Q until approximately 2101Q at which time "SALT SPRAY 26" reported a stranger closing very fast. At time 2102Q, "SALT SPRAY 26" by our record increased his altitude to 40, 000 feet in an attempt to identify the object. While our records do not show it, due to poor communications, it is believed that "SALT SPRAY 26" climbed to 50, 000 feet at some time later. At 2130Q "SALT SPRAY 26" reported still having some object on his port side but our photographs do not show it. "SALT SPRAY 26" was steered for Roosevelt Roads at 2134Q.

In the accompanying photographs, "SALT SPRAY 26" is identified by the letter "A" and what is believed to be the other object is identified by the letter "B". This identification was arrived at by commencing with the merged plot (No. 0751) and tracking backward in time.

At approximately 2110Q, the SPS-49 was jammed for a short period as shown in pictures 0758 to 0760. The source of the jamming is unknown.

The approximate range and bearing from GYATT to "SALT SPRAY 26" for applicable pictures is listed in the accompanying sheet.
