NUFORC UFO Sighting 183086, Occurred: 2024-09-16 23:45 Local – Approximate, Reported: 2024-09-17 15:21 Pacific, Duration: 1-2min, No of observers: 1, Location: Oberlin, OH, USA, Location details: It was hovering by the Old Barrows house, and hovered back into trees nearby, Shape: Disk, Color: dark, greyish, Estimated Size: maybe 1 meter diameter, Viewed From: Land, Direction from Viewer: 165° S, Angle of Elevation: 64, Closest Distance: 15 meters away, Estimated Speed: Quite slow cruising maybe 5 mph, Characteristics: Lights on object, Aura or haze around object, Made a sound. Walking home heard cries of what I thought was a woman, saw it, it slowly backed off and I ran like hell to get back once I realized. I had seen a disk shaped object with a rounded top. lights encircling the disk. this thing had a short cylinder beneath protruding from the disk. The noise coming from it was as if it were a musical drone. I had seen it walking home. I heard what I thought were the shouts of a woman. As I approached I saw that was not the case. The background was an old house with a large lawn with trees around it. [Possible drone but could have been an alien probe as well.

The magnetometer numbers are not impressive on this one but the compass is suspicious. We'll probably never know but a UAP could have dropped off a probe. Look at 20:23 UTC and several minutes prior to and after. Interesting sighting.
