Here is what MUFON has

Not sure what the 4' 6x6 inches is. But we'll get it right. And how far is the canton loc from your now Ball Ground home?

fran

September 27, 2017; Canton, Georgia

Approx 08:52;12 for about one min. Objects were the size of a microwave oven and a 4foot long 6X6 inches, no sound motionless about 20 feet from us, a Farm Bureau adjuster also was present. No noise was coming from craft, they were very bright silver in color. At one time stood motionless in sky. I got my iPhone camera out, was on live view so did not get the pictures I thought I would get. What I saw with my eyes was not what the iPhone recorded. Do not understand this. Again the Farm Bureau rep talked we agreed we would write this off who would believe us. UFO probe left in the blink of the eye. Speed leaving was not from this world. I did call Cherokee Sheriff, gave a report to them. Called the FAA at 10:45 talked to operation manager also sent pictures to them. Again they show up as little white patches in sky. reported to FBI 09:40 ID 9028 I think they thought I was crazy Truly a life changing event at age 70
