UFO Reporting

Early morning on September 27, 2017 waiting for Farm Bureau rep to inspect my daughters Roof for damage. Farm Bureau rep pulled into driveway, getting out of car I noticed he was Looking toward the garage roof, I looked upward toward roof and saw two small rectangle Looking craft. We both looked at each other and said well we did not see this a UFO.

No noise was coming from craft, they were a dull black in color, matched the of the shingles. They remained motionless above roof. I got my iphone 7 camera out, was on live view so did not get the pictures I thought I would get. What I saw with my eyes was not what the iphone recorded. Do not understand this. Again the Farm Bureau rep talked we agreed we would wri this off who would believe us.

The UFO was rectangle shape 20X20 inches at the most no flight surfaces. no noise or lights Had a yellow field around each object. Speed leaving was not from this world, gone in the bli of the eye.

I did call Cherokee Sheriff Dept. , they came out gave report. Called the FAA at 10:54 and talked to Torrance L Branch operation manager 770-210-7622. Also sent him pictures of What I saw. Again they turn up as little bright patches in sky, this is not what your eyes see. When you first see a UFO you do not know how to react, it is something the mind does not Know how to sort out.

Contacted National UFO Reporting Center, talked to Peter Davenport by phone and filing this report. Contacted Apple tech support about iPhone not able to take picture .

Awaiting word from FAA if this was in radar in the Atlanta,Ga area. It is impossible to report a UAP in the USA. Call. FBI 9:40. Agent # 9028. Gave report. We are not alone.

Thank you
