### MUFON CMS Sighting Details:

I was working in my office when i was startled by fast light coming in the window from outside in my backyard. bright blue, green and red lights were glowing from the edges a large dark disc shaped craft ascending from the treetops and hovered over my house to the south. i immediately knew it wasn't a drone or a plane or helicopter or anything i could identify by the size, shape, the glowing changes of the lights around the circles were bright. attached are pictures that very closely resemble what i quickly saw. lie an upside down police car with strobe lights and was probably about 60-80 feet in diameter. i've never witnessed one so close and it caught me off guard.

Pictures:
